

Pre-Visit Photo Checklist

CropLens sample for Collateral inspection firms

One-page workflow sample

Visual: Roswell NM variability workflow sample

Suggested photo/check points before a rural collateral or site visit.

Main takeaway: use this as a pre-visit photo/checklist for the field team; it is not collateral verification.

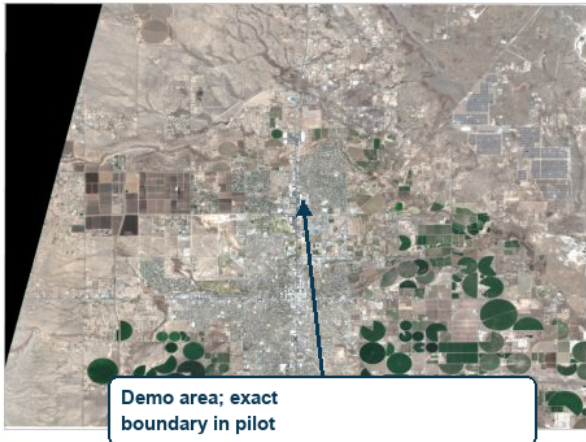

Field
Roswell NM farmland area -
workflow example

Signal
Mixed vegetation signal

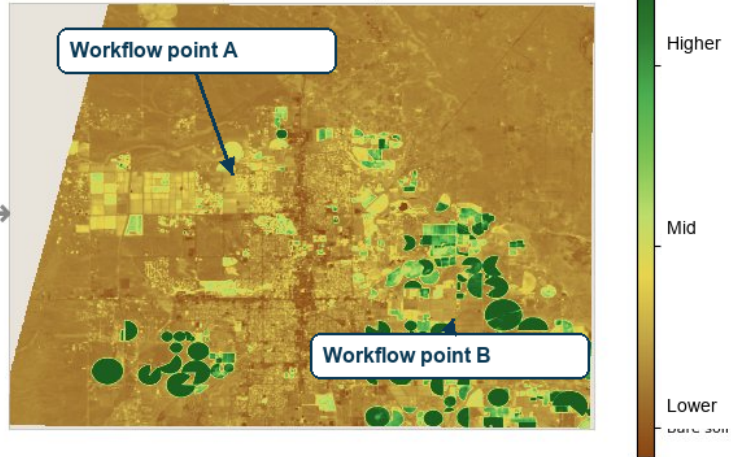

Date
Sentinel-2 visual: 2026-03-25

Boundary
Demo area; paid pilot uses exact
boundary

Vegetation signal

Observed patterns

- Photo point A: review the visible variation before the field team arrives.
- Photo point B: ask the borrower/operator what explains the field pattern.
- Boundary note: use exact parcel/field boundary for the pilot checklist.

Questions to check

- Photo/check point A: what should be photographed first on-site?
- Borrower/operator question: what explains the visible variation?
- Boundary check: are field IDs and exact boundaries available before review?

How to use this

- Use before the truck rolls to prioritize photos and questions.
- Add the checklist items below to pre-visit notes.
- Treat it as field prep, not a site-visit result.

Pilot output includes

- 3-7 suggested GPS/photo/check points.
- Borrower/operator questions for the site visit.
- Source/date/boundary limits for prep-only use.

Guardrail: Field prep only; do not use as collateral verification, site inspection, or lender-decision material.

Limits

Demo sample only. Shows satellite-visible areas to prepare questions and photo/check points. Not a site inspection, collateral verification, or credit/investment decision.
